

Astra Cyber City: World-Class Consortium Driving India's AI Future

A Strategic Partnership Proposal

for G42 and Stargate In Collaboration with HBK DOP

The Astra Cyber City project represents a transformational convergence of visionary leadership, engineering excellence, and strategic partnership. Our consortium combines decades of proven execution capability with deep-rooted relationships across India and the UAE, delivering a "Concept-to-Compute" solution unmatched in the Indian digital infrastructure market.

Consortium Leadership: World One Enterprises

Mr. Siddhartha Srivastava

Founder / Promoter

A recognized pioneer at the forefront of India's digital transformation across three decades, leading every major technological Revolution:

- Cable & Satellite revolution
- OTT/IPTV transformation
- Artificial Intelligence era

Mr. Srivastava's futuristic vision and leadership extends beyond technical expertise to encompass strategic vision and diplomatic acumen. His deep understanding of India's media and data landscape, combined with his ability to forge lasting international partnerships, positions World One as the ideal consortium leader for this landmark project.

Dr. Sumit Chowdhury

Core Management Team

Holds a PhD from Carnegie Mellon University and a degree from IIT Kanpur. He serves as a Technology Advisor for BARC, a Visiting Faculty at CMU, and an Independent Director for several boards.

Anirudh Tiwari

Core Team Member

Director & Co-founder of Crux Capital with 20 years of experience in Banking, He has held key positions at major financial institutions like HSBC, Max Life, HDFC Life, and TATA AIA

Amritha Chowdhury

Core Team Member

A business strategist, engineer, and innovator holding 7 US patents in semiconductors. With degrees from IIT Kanpur, UC Berkeley, and CMU, she has held leadership roles at DY Works and Harlequin

Nitin Khedkar

Core Team Member

Nitin Khedkar is a seasoned telecom and digital infrastructure leader with 27 years of global experience across India, APAC, the Middle East, Africa, the USA, and the UK. He has led major national programs.

Gayathri Gulani

Core Team Member

With extensive experience in Broadcasting and Motion Pictures, including 55+ films and global content sales, she is currently a Vice President at Lionsgate India, focusing on P&L management.

Ashish Jha

Core Team Member

Possessing diverse experience in corporate finance, operations, and strategy across the US and India, with an MBA from NYU Stern. His expertise spans digital business models, consumer tech, and media.

Tina Singh

Core Team Member

6 years of experience in international business development, she has collaborated with world-famous artists and worked on diverse projects related to Metaverse, NFT mining, VFX, animation, and gaming.

Bhavik Unagar

Core Team Member

Bhavik Unagar, a technology entrepreneur and networking specialist with hands-on experience in enterprise networking, data center infrastructure, and software development.

Introducing Astra Cyber City

Strategic Location

Sindhudurg, western coast of India
—proximate to major subsea cable
landing stations ensuring ultra-low
latency to Middle East and Europe

Massive Scale

100X5 = 500 Megawatt campus
purpose-built for High-
Performance Computing and next-
generation AI workloads

Tier-IV Engineering

Specifically designed to handle extreme heat density of advanced AI
processors—future-proof for decades

A Sustainable Legacy Ecosystem

Integrated Smart City Design

Astra Cyber City extends beyond server infrastructure. We are creating a complete ecosystem capable of housing 25,000 technology professionals—a talent hub that G42 can leverage for sustained regional operations.

This integrated approach ensures long-term operational efficiency and attraction of India's exceptional technical workforce.

Net-Zero Commitment

Aligned with UAE's COP28 leadership and sustainability goals, powered by committed renewable energy sources

Talent Magnet

Purpose-built environment attracting India's premier AI and computing professionals

Legacy Infrastructure

Facilities designed for decades of operational excellence and technological evolution

Strategic Bridge: The UAE Connection : HBK-DOP

Trusted Partnership

Long-standing relationship with Sheikh Hamad bin Khalifa bin Mohammed Al Nahyan and HBK DOP Group (Department of Projects)

Cultural Alignment

Deep understanding of Abu Dhabi's values and strategic priorities, ensuring seamless cross-border collaboration

Proven Track Record

Demonstrated commitment to integrity, excellence, and successful delivery of international initiatives with HBK DOP

This relationship serves as a vital bridge of trust between Indian execution capability and UAE strategic interests, de-risking the project and ensuring alignment with the vision of the Abu Dhabi ruling family.

The G42 and Stargate Advantage

We provide the sovereign infrastructure foundation. You provide the intelligence layer, NANDA LLM . Together, we create an unassailable competitive position in South Asia's AI transformation.

1

Traditional Market Entry

4-5 years of regulatory navigation, land acquisition, and infrastructure development

2

Astra Pathway

Execution-ready platform enabling operational deployment within 24 months

3

First-Mover Dominance

Service 1.4 billion people across healthcare, genomics, and smart governance while competitors file paperwork

AI DATA INFRASTRUCTURE

ULTRA-SCALE COMPUTING & INTELLIGENT AUTOMATION

A Historic Market Inflection Point

The Opportunity

India represents the world's fastest-growing digital economy, with data consumption expanding at unprecedented rates. Yet a critical infrastructure gap exists—particularly in advanced AI and sovereign data capabilities.

Organizations that establish dominant infrastructure positions today will control the digital landscape for decades to come.

The Challenge

Traditional market entry in India typically requires 4-5 years navigating complex barriers: land acquisition, regulatory approvals, and securing stable power infrastructure.

We have eliminated these obstacles. The window for market dominance is open—and we are positioned to unlock immediate entry.

Engineering Powerhouse: Sterling and Wilson

World-Leading EPC & MEP Excellence

Sterling and Wilson brings unparalleled global experience in engineering and construction, with a particular focus on mission-critical infrastructure:

- Proven track record delivering massive data center projects worldwide
- Extensive renewable energy integration expertise
- Guaranteed Tier-IV compliance for high-density AI workloads
- Critical power and advanced cooling systems architecture

Their involvement eliminates execution risk on the physical infrastructure side, ensuring that every MEP system meets the stringent requirements demanded by Stargate's supercomputing ambitions.

Technology Backbone: IBM & Partners

AI-Native Architecture

Facility designed from inception to support next-generation artificial intelligence workloads and machine learning operations

Orchestration Excellence

Advanced systems management and workload distribution capabilities supporting G42's supercomputing requirements

Enterprise Security

Military-grade security protocols and hybrid cloud architecture ensuring data sovereignty and compliance

Performance Optimization

Intelligent resource allocation and real-time monitoring ensuring maximum computational efficiency

Connecting Two Strategic Visions

UAE Leadership

Technological supremacy, AI innovation, and regional digital hub positioning

India Scale

Massive market demand, digital transformation acceleration, sovereign data requirements

Astra Platform

The infrastructure backbone connecting both strategic imperatives seamlessly

This is more than infrastructure deployment—it is a Digital Silk Road connecting UAE's technological excellence with India's transformative growth trajectory.

Astra Cyber tech Consortium Partners

Sterling and Wilson: one of world's leading data centers construction company

Over a decade of specialized experience delivering 100+ data center projects . First Indian company to receive Tier-III Ready Certification for prefabricated modular data centers. Comprehensive end-to-end solutions from design to operational management with certified professionals and advanced MEP capabilities.

IBM: AI & Hybrid Cloud Leadership

Global technology leader providing comprehensive AI infrastructure and hybrid cloud solutions. Enables businesses to manage multi-vendor AI platforms with automated workflows, continuous risk assessment, and intelligent asset management. Proven track record with enterprise clients worldwide driving operational efficiency and smarter business decisions.

UB Tech: Advanced Solutions

Cutting-edge technological innovations specialist ensuring Astra Cyber City operates as a true "Smart City." Delivers advanced automation, predictive maintenance, and intelligent facility management solutions.

over 15 thousand data center racks already installed

Dynacon: Infrastructure Integration

Premier leader in IT infrastructure and systems integration with decades of experience bridging physical facility management with complex digital operations. Ensures seamless uptime and operational efficiency through proven methodologies.

The Execution Advantage: Ready to Build

We deliver within 2 years , 2 to 3 years ahead of any competitor.

Approvals Secured

All necessary clearances obtained from Government of India and Government of Maharashtra. Regulatory pathway is clear and de-risked.

Power Locked

Firm commitments secured for 100% renewable power supply. Energy infrastructure partnerships finalized and construction-ready.

Mobilization Ready

Sterling and Wilson prepared to mobilize immediately. IBM architecture design completed. Zero delays in critical path execution.

This consortium is not formed on intent, but on proven capability.

Consortium Strength: By the Numbers

3

Decades

Combined experience in digital infrastructure and AI-ready facilities across consortium partners

100%

Renewable Power

Committed sustainable energy supply ensuring environmental leadership and operational resilience

2

Years to Delivery

Rapid construction timeline from groundbreaking to full operational capability

Tier-IV

Compliance Level

Highest standard for mission-critical infrastructure with 99.995% uptime guarantee

Why This Consortium Wins

Letter of Intent Received and land allotted

Government of Maharashtra Approval

- Letter of Intent received from Government of Maharashtra to proceed with the project immediately
- And 500 acres of land in Sindhudurg allotted

Proven Track Record

Every partner brings documented success in large-scale infrastructure delivery. No theoretical capabilities—only demonstrated results across continents.

Financial Strength

Combined balance sheets and credit facilities ensure project financing is never at risk. Backed by institutions with multi-billion dollar portfolios.

Technical Depth

From civil engineering to AI architecture, every discipline covered by world-class specialists. Seamless integration across all technology layers.

Strategic Relationships

Direct access to decision-makers in both India and UAE. Cultural fluency and diplomatic trust that accelerates every approval and partnership.

Proven Execution Capability

Established UAE Collaboration with HBK DOP

Our successful collaboration with HBK DOP Group in the UAE demonstrates our commitment to delivering world-class infrastructure aligned with Emirati excellence standards.

Regulatory Foundation Complete

All necessary approvals secured from Government of India and State Government of Maharashtra. Most critically, we have locked in firm power commitments—the essential lifeblood of any AI computing center.

01

Government Approvals

Federal and state regulatory clearances finalized with land allocation of 500 acres done by state government

02

Power Infrastructure

500 MW committed capacity with redundancy protocols

03

Technical Consortium

World-class partners aligned for immediate deployment

04

Execution Ready

We are not planning—we are shovel ready to build.

Strategic Partnership Framework

Joint Working Group

Formation of UAE-India operational team to align deployment timelines, technical requirements, and commercial frameworks

Technical Due Diligence

Comprehensive review of infrastructure specifications, power systems, connectivity architecture, and regulatory documentation

Deployment Execution

Phased infrastructure activation enabling G42 and Stargate operations within 24-month window

Market Leadership

Establish unassailable position in South Asian AI infrastructure before competitive alternatives emerge

The Verdict: Execution-Ready Excellence

Fully Assembled Team

Not a collection of aspirations, but a battle-tested consortium with complementary capabilities and aligned incentives.

Zero Execution Risk

Every critical path element—regulatory, technical, financial, and operational—is secured and de-risked through partner expertise.

Trusted by Leadership

Deep relationships with stakeholders in both nations ensure project support at the highest levels of government and investment.

Astra Cyber City: Where visionary leadership meets world-class execution capability to deliver India's premier AI-ready digital infrastructure.
